

MAIZE

LS Tirnavia

Early to semi-early hybrid combining strong yield potential, solid agronomic health and very good forage quality.

- ✓ Very good yield potential
- ✓ Very good digestibility and feeding value
- ✓ Rustic, very good health profile

IDENTITY

TYPE

Flint to semi flint

MARKET

Grain and silage

GENETIC

3-way cross

EARLINESS

Early to semi early (end of B group)

REGISTRATION

2011 – European Union

AGRONOMIC PROFILE

Early vigor 9/10

Morphology 9/10

Ear insertion 4/10

Lodging resistance 10/10

Yield 9/10

SILAGE MATURITY (30% DM)

1,480°C

GRAIN MATURITY (35% MOISTURE)

1,700°C

TECHNOLOGICAL QUALITIES

Feeding value 9/10

Digestibility 9/10

CULTIVATION ADVICE

- > Plant between 95,000 and 105,000 seeds per hectare
