

MAIZE

Rudilia

Semi-early hybrid with strong silage potential, solid stress tolerance, and very good feeding value.

- ✓ Very good silage yield potential
- ✓ Very good digestibility and feeding value
- ✓ Good performance in difficult and dry conditions

AGRONOMIC PROFILE

Early vigor	10/10	Morphology	9/10
Plant height	8/10	Ear insertion	4/10
Flowering earliness	6/10	Disease profile	9/10
Lodging resistance	9/10		

SILAGE MATURITY (32% DM)
1,520°C

GRAIN MATURITY (35% MOISTURE)
1,770°C

IDENTITY

TYPE
Semi-dent to Dent

MARKET
Silage

GENETIC
3-way cross

EARLINESS
Semi early – C1 group

REGISTRATION
2014 – European Union

TECHNOLOGICAL QUALITIES

Feeding value	9/10
Digestibility	9/10

CULTIVATION ADVICE

- › Follow maturity targets: 1,520°C (silage), 1,770°C (grain)
