

MAIZE

SERBILIA

Late dent hybrid delivering strong grain performance, robust plant structure and excellent tolerance to lodging and diseases.

- ✓ Very productive and regular hybrid
- ✓ High and well developed plant, good staygreen
- ✓ Excellent grain yield
- ✓ Very good tolerance to lodging and diseases

AGRONOMIC PROFILE

Early vigor	9/10	Morphology	10/10
Plant height	9/10	Ear insertion	3/10
Flowering earliness	9/10	Disease profile	10/10
Lodging resistance	10/10		

SILAGE MATURITY (32% DM)
1,670°C

GRAIN MATURITY (35% MOISTURE)
1,900°C

IDENTITY

TYPE
Dent

MARKET
Grain

GENETIC
Single hybrid

EARLINESS
Late – FAO 450

REGISTRATION
2014 – European Union

TECHNOLOGICAL QUALITIES

Feeding value	9/10
Digestibility	9/10

CULTIVATION ADVICE

- › Silage target: 1,670°C (32% DM)
- › Grain target: 1,900°C (35% moisture)
